SAMRA HIFZUR RAHMAN

Full Stack Software Engineer, React, TypeScript, Node.js, LLM Applications

Email: azharisamra@gmail.com
LinkedIn: linkedin.com/in/samrahifzurrahman
GitHub: github.com/azharisamra
Portfolio: samraazhari.netlify.app
Location: Mumbai, India. Relocating to the UAE, open to any city. Available to join immediately.
Nationality: Indian. Languages: English (fluent), Hindi, Urdu, Arabic (basic).

PROFESSIONAL SUMMARY

- Software Engineer with 4 years of experience across frontend and full-stack web development and AI coding benchmarks. Targeting Full Stack Developer, Frontend Engineer and AI Engineer roles.
- Builds React and TypeScript applications, from real-time industrial dashboards at Baker Hughes to an LLM-powered portfolio assistant built with Next.js and Node.js.
- For 2 years at Scale AI has built and debugged verifier code and cloud test environments (AWS CDK, Docker, LocalStack) used to train and evaluate AI coding models, working daily with LLMs, agentic workflows and MCP tool calling.
- Strong testing habits: Jest, React Testing Library, Vitest and code review, with a focus on catching bugs before they ship.

SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, Java, SQL, HTML5, CSS3

Frontend: React.js, Next.js (App Router, Server Components), Redux, Tailwind CSS, Framer Motion, Responsive Design

Backend and APIs: Node.js, REST APIs, Spring Boot, Flask

AI and LLM: LLM API Integration, Prompt Engineering, Agentic Workflows, MCP Tool Calling, Multi-Agent Workflow Testing, LLM Evaluation, AI Coding Tools (Claude Code, Lovable)

Cloud and DevOps: AWS, AWS CDK (Infrastructure as Code), Docker, LocalStack, CI/CD, GitHub Actions, Jenkins, Netlify, Elasticsearch, Kibana, Grafana, Prometheus

Databases: MongoDB, MySQL, Firebase

Testing: Jest, React Testing Library, Enzyme, Vitest, Unit Testing, Code Review

Tools: Git, GitHub, Figma, Storybook, Webpack, npm, Agile, Scrum

WORK EXPERIENCE

GenAI Code, Queue Manager — Sep 2026 – Present

Queue Manager, Operations (QMO) — Oct 2024 – Aug 2026

Scale AI (Outlier), Contract, Remote, India

- Built AI agent skills in Claude Code (Python and Bash scripts, Markdown instructions and system prompts) that run as agents to automate quality checks on each task against the pass or fail threshold, working daily with LLM APIs, agentic workflows and MCP tool calling.
- Wrote golden trajectories for multi-step MCP tool-calling tasks and tested multi-agent workflows end to end, checking both the task design and the grading code.
- Built and debugged verifier scripts and test suites in Python, TypeScript and JavaScript that automatically grade AI coding tasks used to train and evaluate large language models (LLMs), across 7 benchmark projects (coding, MCP tool calling, Infrastructure as Code and cybersecurity).
- Built cloud test environments with AWS CDK in TypeScript (ECS Fargate, DynamoDB, IAM, KMS), Docker and LocalStack so that benchmark tasks run the same way on every attempt.
- Fixed tests in a 34-check Infrastructure as Code suite that wrongly penalised correct least-privilege solutions, and rebuilt a cloud benchmark task that could be passed by accident, then re-verified it across repeated runs.
- Debugged code across Python, JavaScript, TypeScript and Java benchmarks, finding false passes and missing test cases and getting them fixed before release.
- Reviewed deliberately vulnerable web apps (SQL injection, IDOR, path traversal) for a cybersecurity benchmark, checking each exploit path and its grading.

Early Career Trainee, Frontend Developer **Mar 2023 – Feb 2024**
Baker Hughes, Mumbai, India

- Built real-time dashboards for oil and gas well data using React.js, TypeScript and Redux, reducing application load time by 30%.
- Built monitoring dashboards in Kibana on Elasticsearch data, and some in Grafana with Prometheus metrics.
- Delivered UI enhancements for an equipment inventory management web application.
- Wrote unit tests with Jest and Enzyme, raising code coverage and helping cut reported bugs by 20%.
- Worked 6 months in a QA role: tested new features before each release, wrote test cases and logged defects for the development team.
- Took part in code reviews, sprint planning and releases in an Agile Scrum team, from design through deployment.

Web Developer **Jul 2022 – Sep 2022**
Adguru Online, Mumbai, India

- Delivered 4 responsive, SEO-friendly client websites with cross-browser compatibility and faster page loads.
- Turned client requirements into working web pages on agreed timelines.

Web Developer **Oct 2020 – May 2021**
Resume Jar, Mumbai, India

- Maintained and improved the company website with responsive layouts and SEO optimisation.

PROJECTS

AI Portfolio Assistant *(Next.js, TypeScript, Node.js, Gemini API)* **2025 – Present**

- Built a Q&A assistant that calls an LLM API to answer recruiter questions about my background, grounded in structured profile data to keep answers accurate.
- Built the backend as a Node.js API route that streams answers from the Gemini API, keeps the API key on the server, checks every question and limits requests per visitor and per day, with Vitest tests.
- Rebuilt the site as a Next.js App Router application with React Server Components and strict TypeScript.
- Added theming with no first-paint flash, generated social preview images, SEO metadata; deployed on Netlify.
- Set up a GitHub Actions pipeline that checks types, runs 40 Vitest tests, lints and builds the site on every push and pull request.

Nestwise *(React, Firebase)* **2025 – Present**

- Expense tracker with real-time sync between two users, proportional bill splitting and shared savings goals; live at neswise.netlify.app.

Artify and Athletee *(Next.js, Framer Motion)* **2023**

- Two responsive, animated websites (an art showcase and an athlete site) built with reusable components and smooth page transitions.

EDUCATION

Master of Computer Applications (MCA) **2023**
SNDT Women's University, Mumbai, India

Bachelor of Computer Science **2021**
Savitribai Phule Pune University, Pune, India

CERTIFICATIONS

React: The Complete Guide (incl. React Router and Redux), Udemy, **Dec 2023**
